Education

Siksha 'O' Anusandhan, Bhubaneswar, Odisha Sep 2021 - Sep 2025
Bachelor of Technology - Computer Science and Engineering CGPA : 9.26/10

Skills

Languages: Java, Python, HTML, CSS, Javascript, Apex
Databases: MySQL, DynamoDB
Tools & OS: Git, GitHub, Linux, UNIX shell, Maven,,OpenCV
Libraries & Frameworks: Spring, Spring Boot, ReactJs, Tailwind
Cloud Technology: AWS, Azure
Soft Skills: Agile, Critical Thinking, Adaptable

Experience

System Engineer (Salesforce developer), Tata Consultancy Services Feb 2025 - Present

- Developed and customized Salesforce features using **Apex, Lightning Web Components (LWC), SOQL, and Flows** based on business requirements.
- Configured **custom objects, validation rules, page layouts, and automation** to streamline business processes.
- Collaborated with cross-functional teams in an Agile environment to implement enhancements, resolve bugs, and support application deployments.

Junior Software Engineer intern, Epam Systems Jan 2025 - June 2025

- Developed backend systems in Java, applying OOP principles, design patterns, and functional programming, which **improved code reusability by 25% across modules**.
- Engineered microservices with Spring Boot and Hibernate, integrating MySQL, building RESTful APIs, and ensuring quality through unit testing (JUnit, Mockito).
- Practiced clean code standards, managed version control with **Git, and collaborated in Agile Scrum environments with regular peer code reviews**.

Cybersecurity Trainee, EY GDS June 2024- Aug 2024

- Strengthened network and cloud security by configuring access controls, identity management, and network segmentation, which **improved overall system resilience against unauthorized access and misconfigurations.**
- Designed and implemented 10+ security setups, including firewalls for traffic filtering, VPNs for secure remote access, and encryption protocols to protect sensitive data in transit and at rest.
- Integrated compliance frameworks into cloud deployments to **support audit readiness.**

Achievements

- **HackNITR:** Participated in a 36-hour long hackathon ranking among **Top 5 out of 100 teams.**
- **Smart India Hackathon:** Qualified the Institute Round ranking among **Top 10 out of 104 teams**.

Projects

Estrus Detection in Cattles · Github Feb 2025 - April 2025
OpenCV, NumPy ,Pandas, PyTorch, Matplotlib

- Implemented an AI-powered estrus detection system using YOLOv11 for real-time identification of heat behaviors in cattle, **achieving over 85% detection accuracy in field trials.**
- Formulated a labeled dataset pipeline with annotated visual data and integrated a pose analyzer to detect behavioral cues like mounting and tail raising, **improving model performance by 30%.**

DTC Optimus - Automated Bus Scheduling and Route Management System · Github Aug 2024 - Sept 2024
Smart India Hackathon'24 | NodeJs, Python, NextJs, Ola Cloud Services

- **Spearheaded frontend development** for Route Management System, designing an intuitive user interface that streamlined route planning and duty scheduling, leading to a **25% decrease in time spent on manual tasks**.
- **Engineered a GIS-based live transit feature** that implemented real-time route monitoring using **Ola Maps SDKs**, **leading to a 30% reduction** in scheduling errors and significantly enhancing operational efficiency for the Delhi Transport Corporation.
