Summary

System Engineer at TCS with a background in Java backend development, Salesforce, REST APIs, and enterprise application development. Experienced in building application features, working with data, and solving technical problems. Interested in translating business needs into practical solutions through structured problem-solving, rapid-prototyping, technical understanding, and product thinking.

Education

Siksha 'O' Anusandhan, Bhubaneswar, Odisha Sep 2021 - Sep 2025
Bachelor of Technology - Computer Science and Engineering CGPA : 9.26/10

Skills

Technical: Java, Python, JavaScript, Apex, SQL, REST APIs, Spring Boot, Microservices, Salesforce, Lightning Web Components (LWC)
System Design & Development: Object-Oriented Design, Backend Development, API Integration, Database Design, Debugging
Data & Analytics: MySQL, DynamoDB, Pandas, NumPy
Tools & Platforms: Git, GitHub, Maven, AWS, Azure

Professional Experience

System Engineer (Salesforce developer), Tata Consultancy Services Feb 2026 - Present

- Develop and customize Salesforce application features using Apex, Lightning Web Components (LWC), SOQL, and Flows to support business workflows.
- Work on REST API integrations, debugging, and issue resolution to improve application reliability and performance.
- Implement access controls and secure coding practices while developing enterprise application functionality.

Junior Software Engineer intern, Epam Systems Jan 2025 - June 2025

- Developed Java and Spring Boot backend services using object-oriented design principles, improving code reusability by 25% across modules.
- Built microservices integrated with MySQL and optimized database interactions to improve application performance.
- Applied modular design principles to develop maintainable backend functionality and support integration across services.

Achievements

- **HackNITR:** Ranked Top 5 among 100 teams in a 36-hour HackNITR hackathon.
- **Smart India Hackathon:** Ranked Top 10 among 104 teams in the Smart India Hackathon Institute Round.
- **Salesforce Certification** – Salesforce Certified Platform Administrator, Salesforce Certified Platform Developer

Projects

Estrus Detection in Cattles · Github Feb 2025 - April 2025
OpenCV, NumPy ,Pandas, PyTorch, Matplotlib

- Developed an AI-based detection system using annotated visual data to identify heat-related behaviors in cattle, achieving over 85% detection accuracy in field trials.
- Built a labeled dataset pipeline and integrated pose analysis to identify behavioral cues, contributing to a 30% improvement in model performance.

DTC Optimus - Automated Bus Scheduling and Route Management System · Github Aug 2024 - Sept 2024
Smart India Hackathon'24 | NodeJs, Python, NextJs, Ola Cloud Services

- Contributed to a route management solution addressing manual route planning and duty scheduling challenges for Delhi Transport Corporation.
- Translated operational requirements into feature workflows and prioritized implementation based on user needs and technical feasibility.
- Engineered GIS-based live transit monitoring using Ola Maps SDK, contributing to a 30% reduction in scheduling errors.
